

Uday Tatiraju

Tech Lead and Principal Software Engineer
Oracle

Uday Tatiraju is a tech lead and a principal software engineer at Oracle. His background and experience are in information retrieval, machine learning, artificial intelligence, public policy, natural language processing, and distributed systems. He also is an editor at InfoQ, where he writes news pieces and publishes articles about technology. He also publishes case studies and articles in medical journals primarily about integration of AI/ML and medicine. On the volunteering front, together with his fellow AI Council members, Uday helps to strategize and build technical resources on artificial intelligence and its subsets as part of CompTIA's AI Council.
